

APPLICATION / REF. JOB-SHIPPEO-2026

15 August 2026  
Shippeo  
Paris, France

Supply Chain Data & BI Engineer

Shippeo • Remote / Hybrid

Dear Hiring Team,

The dashboard is not the deliverable. The operating decision is. That is how I work as a Decision Engineer.

As a Supplier Quality Engineer at Magna International, I operate between global suppliers, quality evidence, and operational risk. I convert fragmented inputs into clear ownership and automated decision views. The SQE BI command center I developed traces activity across 6 control modules and 4 lifecycle gates, highlighting critical components and triggering automated alerts before open issues turn into launch risks.

That experience translates directly to the challenges at Shippeo: mapping business workflows, structuring KPIs, designing automated exception queues, and providing leadership with defensible operating signals rather than passive reports.

I would welcome a conversation about the operational workflows and decision systems Shippeo wants to structure next. You can inspect my live decision systems and evidence trails in my portfolio.

Sincerely,  
Rida Melkaoui
